Interests

- Machine Learning
- Full Stack Web Development
- Natural Language Processing
- Robotics
- Android App Development
- Game Development

Highlights

- Database Development
- Android Development
- Web Development
- Software Engineering
- Machine Learning
- Arduino
- Robot Operating System
- Natural Language Processing

Determined and diligent university student working towards a degree in Computing Science. I am seeking an opportunity to use my hard work and technical skills to help create and innovate solutions for modern problems in the 21st century.

University of Alberta – Academic Status

Computing Science, BSc Specialization

December 2021

Grade Point Average (2020-2021)

3.0

Available for work Starting

January 2022

Computer Experience

Programming Languages: C, C++, Python, Java (Android), MySQL, RISC-V Assembly, C# (for Unity3D), HTML5, CSS3, JavaScript

Other Software: VS Code, LoggerPro, Microsoft and Google Suites, Linux, Robot Operating System (ROS), git, GitHub, Docker, Heroku, Django, Unity3D, Android Studio

Hardware Applications: Arduino

Activities

HackED 2020

January 2020

- Created a mobile cross platform app that enables users to incorporate image recognition capabilities. To be exact, that is OCR (Optical Character Recognition) and object detection. For both outputs the user is able to either open a link (if applicable) or run a valid search query. We managed to obtain a trained model for object detection for iOS and also link the Firebase google cloud Tensor flow API to highly increase OCR accuracy. Furthermore, for Android, I was able to implement text translation using Google translate API.

NASA CSA Space Apps Challenge

October 2019

- Won **first prize** for the challenge SCISAT – **Canada's Atmospheric Chemistry Experiment** for being able to identify differences in gas concentrations and predict some atmospheric events in Arctic Region based on some satellite data.

- Designed an application to retrieve satellite data from an FTP server with Python and displayed all the analyzed data with multiple graphs on a webpage.

Languages Known

English

Hindi

French (beginner)

Other Skills

- UML
- Design Patterns
- OOP
- Data Structures
- Algorithms
- Makefiles
- SQLite
- Dynamic Programming
- Q-Learning
- SARSA
- Autoencoders
- Deep Neural Networks
- Bootstrap
- Android Studio
- ER Diagrams
- Decision Trees
- Convolutional Networks
- Heuristic Search
- Monte Carlo Tree Search
- AJAX
- FSM
- A* Search
- Reinforcement Learning
- Regular Expressions
- N-Grams
- Naïve Bayes
- Sentiment Classification
- Context Free Grammars

HackED 2019

- Designed a web scraper application using Python and Django to retrieve information from yahoo finance website for any requested stock and display information on local server in a formatted way for easy data analysis.
- The main need for such an application was the discontinuation of yahoo finance API which made user analysis using years of data harder.

Projects

- **LinkedSpace** - A social media web platform which is interconnectible to other platforms using REST API. [Video Demo](#)
- **Mood Space** - A social media android app which focuses on moods.
- **ChatbotNLP** - Implementation of Chatbot using Intent Classification.
- **Quadris** - Tetris with modified rules.
- **PSDCA** - Face Mask Detection in live video feed.
- **Gomoku Players** - Implementation of Monte-Carlo Tree Search for the game of Gomoku.
- **ROS Navigation** - Navigation Stack for Summit XL robot.
- **RL Robotics** - TD Learning algorithms for Drone Parrot.

Research

- **Comparing “Surprisal” in Language Models** (Link to Paper)

Certificates

- Completed 5 day Leadership program by King's College London
- [The Web Developer Bootcamp 2021 – Udemy](#)
- [Code Foundation for ROS – TCS](#)
- [Deep Learning Essentials – IBM](#)
- [IBM Blockchain Essentials V2 - IBM](#)
- [Android Application Development](#)

Work Experience

IT intern

(July 2018 – August 2018)

Dover India Innovation Centre (Bengaluru, India)

- Experience in Developing and Designing Dover India Intranet using MS SharePoint.

Web Developer Intern

(July 2021 – August 2021)

Astute Arrow SMART Digital Transformation (Remote)

- Worked as front end developer of the website.
- Participated in team meetings and gathering requirements.
